-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 29-38 and 76-80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wylie et al '223 in view of Stemmer et al.

Stemmer discloses the use of ultraviolet curable adhesive as well as the equivalence of this type of bonding with heat sensitive bonding. It would have been obvious to modify the adhesive of '323 whereby ultraviolet curable adhesive is used so as to eliminate potential damage to the screen and frame from the application of heat. The specific wavelength and application time of the light would clearly have been an obvious design choice based on the specific materials used, tension in the mesh, etc. Wylie et al provides plural rollers for inserting the screen. Beginning the insertion in the middle of a frame side is well known in the screen art so as to evenly tension the screen.

Allowable Subject Matter

Claims 19-28 and 71-75 are allowed.

Response to Arguments

Applicant's arguments have been fully considered. The rejections under 112(1) have been rescinded per Applicant's remarks. Applicant argues that Stemmer is not applicable to the screen art. However, it is merely relied upon to teach the use of

ultraviolet curing means to mount a flexible sheet in a frame. It would have been well within the purview of one of ordinary skill in the art to go to Stemmer for this teaching.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
